JUNE BEARING

HARDY IOWA

GROWN

NOTICE—WE HAVE MANY CALLS FOR PLANTS FOR AUGUST AND SEPTEMBER PLANTING. THE NEW FIELD GROWN RUNNER PLANTS ARE NOT MATURE ENOUGH TO SHIP AT THIS EARLY DATE. HOWEVER WE DO HAVE DORMANT EARLY SPRING DUG PLANTS HELD IN OUR MODERN COLD STORAGE. THE U. S. GOVERNMENT EXPERIMENT STATIONS AND LEADING SEED HOUSES AND NURSERYMEN AGREE THAT DORMANT STOCK IS BEST FOR LATE SUMMER AND EARLY FALL PLANTING. WE RESERVE THE RIGHT TO SHIP FALL DUG PLANTS AFTER SEPTEMBER 25.

BEAVER

(Early)

Beaver is a cross between Dunlap and Premier and has retained the best qualities of both. Beaver has a dark green foliage and is a very strong grower with a large fibrous root system making it very drought resistant. Berries are a deep glossy red with the color extending clear through to the center of the fruit. Beaver is a good plant maker and in growth resembles the Dunlap more than it does the Premier. In a State Experiment Farm near here Beaver outyielded all other varieties.

BLAKEMORE

In the years since its introduction by the United States Department of Agriculture, the Blakemore has made a steady gain in acreage planted. It is a cross between the Missionary and Premier varieties. Blakemore is a very good keeping berry which makes it a shipping favorite. It has easy hulling qualities, uniform shape, firm and solid flesh, light bright red color, and high pectin content.

BELLMAR

(Early)

This is another of the new varieties. One of the surest indications of popularity is the increasing demand each year for plants of Bellmar. Bellmar in growth resembles the Premier with the exception that it will make more plants than the Premier. The extra large berries are very attractive, have a dark red color that extends clear through to the center of the berry. The fruit stands up well in shipping. We think Bellmar is better than Premier for Missouri, southern Illinois, Kentucky and other localities to the south of us.

—For areas south of Iowa, Nebraska and Michigan.

PREMIER

(Early)

—Especially good for entire United States except deep south and west of Rocky Mountains.

Premier is the very best of the older varieties. It is one of if not the earliest berry we have and at the same time will resist frost more than other varieties which bloom at the same time. The picking is best before other commercial varieties come into bearing, thus gaining for the grower the higher prices that early fruit commands. The foliage is tough and healthy, covering and protecting the blooms and shielding them from frost. Premier will not make quite as many plants as the Beaver, Blakemore, or Dunlap, but it produces large husky plants which can support a lot of large berries. The fruit ships well and is very firm. It is pointed, bright showy red, and has a nice calyx.

DUNLAP

(Midseason)

—Does well in all areas except deep south.

The well known Dunlap is one of our oldest varieties, sometimes known as Dr. Burrill. It is, we believe, the most widely planted variety in existence. Almost everyone who has had a strawberry patch knows the Dunlap. If you have never grown strawberries we think Dunlap is the variety to start with for it is extremely vigorous, free from disease, and will make more plants than any other variety grown in the middlewest. While the fruit of the Dunlap will not stand up long enough for shipping long distances, it is very hard to beat for local marketing.

NEW ARMORE VARIETY

Quality

**FLAVOR
AND
MARKET
VALUE**

**Excellent for south central states,
also Missouri, Illinois and Indiana**

The Armore is a cross between the Blakemore and the Aroma strawberries and was developed by Professor Swartout of the University of Missouri, Department of Agriculture. We have been informed that in yield it exceeds both Aroma and Blakemore.

The fruit is large, well-shaped and holds its size until the end of the season, and does not have a core like its parent Aroma. It ripens 10 days after Blakemore.

The Armore is a fair to good plant maker, making husky good size plants which do not seem to be affected with leaf spot or other leaf diseases. Reports from the growers who have fruited Armore are very enthusiastic. We believe this berry is going to be a money maker.

THE WORLD'S GREATEST STRAWBERRY

The size of Giant Robinson is practically indescribable. The plant is peculiar, inasmuch as it only sends out one fruit stem but this fruit stem will have from two to three huge berries on it. This variety will produce as many or more quarts per acre than Premier. Fruit is outstanding due to its size and coloring.

THRIVES IN POOR SOIL

Due to its plant making ability, the Giant Robinson will thrive and produce a crop of berries on rather poor soil. Robinson is a perfect flowering variety which requires no pollinizing. The plant is rather small but exceptionally long rooted. It has healthy foliage, is an excellent plant maker, and an immense producer. **Perfect flowering.**

ROBINSON

COMMERCIAL GROWERS

Write for special prices on quantity lots. All plants guaranteed disease free. State inspected twice during growing season. Grown under irrigation on sandy river bottom soil. All orders filled with plants dug fresh the day order is filed.

red rich EVERBEARING

(Plant Pat. No. 993) The Greatest Development in Strawberry Varieties in the Past 50 Years

RED RICH Everbearer, we believe, will soon become the leading everbearing strawberry variety in the United States. It has all of the superior qualities which we have been looking for in any strawberry, as well as being an everbearer.

The RED RICH is distinguished from all other strawberries by its deep red color which runs entirely through the berry. The redness indicates unusually great conversion to sugar. The permanent firmness of the berry texture adds to its freezing potential. The berries maintain their actual shape after thawing. Deep Red Color, High Sugar Content, Firm Texture. These qualities make RED RICH a top notch berry for freezing, preserves, and processing. The berry itself is firm; stands up well and ships well.

Heavy yielding along with the rich glossy appearance of the berries gives it top rating from the grower's standpoint.

Make a trial planting of RED RICH this year and be convinced of its superior qualities.

VIRUS FREE STOCK

We have the following varieties raised from virus free mother stock. They have been carefully sprayed and show excellent vigor and growth ability. Varieties available are Dunlap, Robinson, Premier, Bellmar, Vermillion and Blakemore. Your order will be filled from these special stocks at no increase in cost.

EVERBEARING STRAWBERRIES

THE BIG FOUR

1. SUPERFECTION

EVERBEARING — A very popular new everbearing that is gaining wide favor. Was originated by the same man that originated the famous Gem Everbearing. Berries are large and of exceptional quality. Plants begin bearing 30 days after planting and continue until frost. Perfectly hardy and an excellent freezing variety. We predict a great future for Superfection.

2. GEM

Our favorite everbearing variety. Generally outyielded all other varieties. Gem is a good plant maker and a thrifty grower. We have noticed that Gem is listed by more Nurseries than any other everbearing variety, which shows the popularity it enjoys across the country. Gem berries are medium to large, very smooth and uniform. The color and shape of this variety make a very attractive box of fruit. The foliage is dark green and is free from leaf troubles.

3. STREAMLINER

An outstanding variety. Many growers, after fruiting this variety, are very enthusiastic, saying that Streamliner has everything needed to place it in first place in the everbearing family. A vigorous plant maker. High quality fruit that is not acid like many other varieties. Many people who are allergic to acid and tart berries can eat and enjoy Streamliner. We recommend Streamliner to anyone wishing to try a good everbearer.

4. 20th CENTURY

This variety is outstanding in many ways, mammoth size, rich red color, honey sweet, adaptable to all soils and climates. Bears in 60 days, excellent shipper and always in demand. 20th Century is the result of carefully planned crossing of Wazata and Supreme. It has the quality of Rockhill but is many times more productive.

NEW STRAWBERRY VARIETIES

NOTICE—THESE VARIETIES AVAILABLE AFTER OCTOBER 1

POCAHONTAS FALL PLANTING

Pocahontas was introduced by the U. S. Department of Agriculture, in 1954, and is Rapidly Developing Into An Outstanding Variety. Berries of Pocahontas are Deep Glossy Red, the skin is tough, and the flesh is firm. Thus, it is a fine shipping variety. From New Jersey to North Carolina and westward to Arkansas, Pocahontas has given excellent crops. Our plants are strong and vigorous.

EMPIRE

(June bearer.) Ripens late midseason. Great big, luscious glossy red berries, so attractive in appearance they are always in demand and command high prices on the fancy fruit market. An excellent keeping and shipping variety. Plants are vigorous growers and dependable bearers.

PAYMASTER

(June bearer.) Ripens midseason. Similar to Sparkle but in tests it proved to be a superior variety. Plants are highly productive, thrifty growers and good runner makers. Berries have good dark red color clear through and are juicy yet firm, making it an excellent freezing and shipping variety.

NEW VARIETY COLLECTION

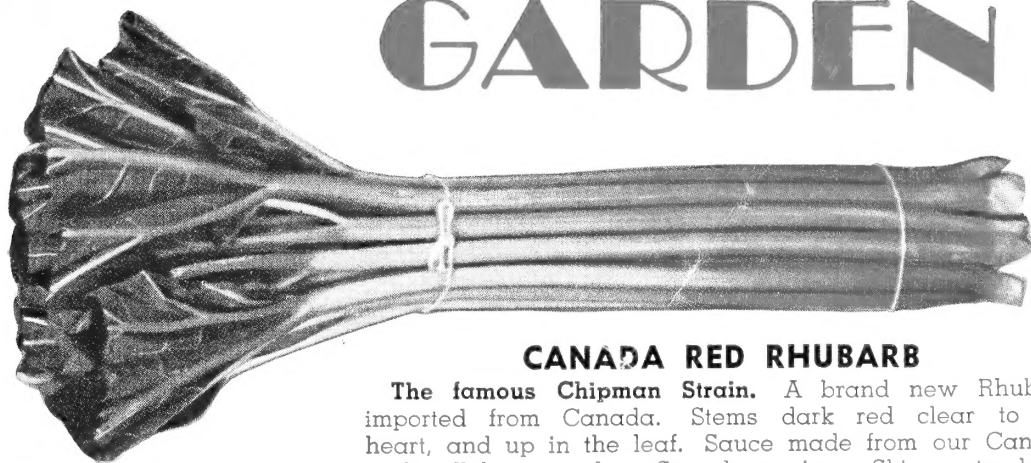

WE OFFER 50 EACH EMPIRE, POCAHONTAS AND PAYMASTER.

150 FINE PLANTS ONLY \$2.75

**NEW VARIETY PRICES — 50 FOR 85c, 100 FOR \$1.50, 1,000 FOR \$15.00

GARDEN ROOTS

CANADA RED RHUBARB

The famous Chipman Strain. A brand new Rhubarb imported from Canada. Stems dark red clear to the heart, and up in the leaf. Sauce made from our Canada Red will be as red as Strawberry jam. Skin so tender it can be cooked with the stem. We offer divisions as it cannot be grown from seed.

Price of Canadian Chipman Red

Divisions—60c each; 2 for \$1.00; 6 for \$2.75; 12 for \$5.00.

- ★ It's red clear through
- ★ It's crisp and juicy
- ★ It's mildly acid
- ★ Requires less sugar
- ★ It's TOPS

RHUBARB

MYATTS LINNEAUS—One of the most popular varieties. It is a type that everyone can grow with success as it is not so particular as to treatment and soil variations. Linneaus is early, tender, and fast growing with a mild sub-acid flavor. This variety is not tough and stringy like some kinds. We recommend Linneaus to everyone.

MYATTS LINNEAUS PRICES

MYATTS LINNEAUS—Strong 1 year plants—8 for 65c; 15 for \$1.00; 40 for \$2.50.

HORSERADISH

Everyone should have a corner of their garden planted in horseradish. Does well in any location. We offer crown cuttings which are quicker in growth, or root cuttings at a savings in price. We offer the Giant Bohemian variety.

HORSERADISH PRICES

CROWNS—5 for 50c; 20 for \$1.50; 100 for \$6.50.

ROOT CUTTINGS—12 for 60c; 25 for \$1.00; 100 for \$3.00

GIANT THORNLESS BOYSENBERRY

HARDY, QUICK GROWER, HEAVY YIELDER, HIGH QUALITY FRUIT, EXCELLENT FLAVOR—By far the largest and heaviest producing berry of the blackberry or dewberry family. For certain success and greater profits be sure to include Boysenberry in your plantings. It is an established fact that Boysenberry brings much higher prices than other bush fruits. Plant a row of Boysenberry and it will be the pride of your garden.

"Ebony King" GUARANTEED TO BEAR BLACKBERRY

Ebony King is a new Blackberry, exceptionally large. They are very sweet and have the wonderful sweet Blackberry flavor. Ebony King ripens about ten days earlier than Eldorado. The bushes are upright with very strong canes.

SAGE

SAGE—A favorite perennial. A few bushes will keep you in fresh, pungent sage leaves for seasoning dressings, sausage, etc.

PRICES—35c each; 5 for \$1.50; 25 for \$6.00.

ASPARAGUS

MARY WASHINGTON ASPARAGUS

—This high quality strain is a favorite with everyone. It is one of the best for your garden. Has long tender tips that do not branch out until a foot or more in height.

ASPARAGUS PRICES

Strong 1 year plants: 20 for 60c; 40 for \$1.00; 100 for \$2.00; 500 for \$9.00.

Two Year Plants — Double above prices.

GOOSEBERRIES—CURRANTS

NEW PIXWELL GOOSEBERRY—A grand new variety that is going to be very popular. Bred in the north for extreme hardiness. Berries much larger than usual sorts. Berries are very easy to pick hence the name Pixwell. Thorns on Pixwell lose their sharpness on bearing wood and berries are held to the outside of the bush. Pixwell is the best Gooseberry developed in many years.

2-year No. 1 plants: 70c each, 5 for \$3.00, 10 for \$5.00.

RED LAKE CURRANT—The best Red Currant in all climates. The bushes are absolutely hardy. Highly productive. The extra large red berries are borne on big, well-filled clusters. Excellent flavor. Midseason but holds on late. Best of all currants.

2-year No. 1 plants: 50c each; 5 for \$2.25, 10 for \$4.00.

★ SPECIAL ★

We have a fine supply of heavy 2-year transplants of thornless Boysenberry. You can not go wrong on these. Get monster berries first year and full crop second year.

Prices 2-year Bearing-age Plants: 5 for \$1.50; 10 for \$2.00; 25 for \$4.00.

PRICE EBONY KING

No. 1 Plants: 12 for \$3.50; 25 for \$6.75; 50 for \$12.75.

ETOILE DE HOLLAND—Large, velvety crimson flowers, richly perfumed. Long stems.
PRESIDENT HOOVER—Multi-colored. Large flowers of scarlet, yellow, cerise, pink and flame.
PINK RADIANCE—Large globular flowers of carmine rose with shades of opal and copper. An old favorite.
RED RADIANCE—Large, globular flower of an even, clear red.
POINSETTIA—A rose of true poinsettia color. One of the most brilliant red roses ever produced. Buds are ideal in form, long and pointed.
CRIMSON GLORY—One of the best red roses. Well known deep velvety crimson of merit.
FRAU CARL DRUSKI—Most popular white rose. Large snowy white double blooms.
GRENOBLE—One of the best reds. Double scarlet blooms of excellent form and beauty.
THE DOCTOR—Silvery pink. Immense blooms considered one of the most beautiful. Fine for cutting, extremely fragrant.
GOLDEN DAWN—Bud rich, sunflower yellow, flushed old rose. Double flowers. Very hardy variety.
PICTURE—Flowers are very double and open to velvety clear, rose-pink, with undertones of salmon. Strong and vigorous grower.

CONDESA de SASTAGO

—Double rich flowers of coppery red and yellow. Rich raspberry perfume.

ROUGE MALLERIN

Double and well formed blooms of striking and lasting deep red.

SUNBURST

Beautiful two tone yellow-pink combination.

BETTY UPRICHARD

Salmon pink stained with copper. Red. Very good.

1. K A Victoria; 2. Picture; 3. Rouge Mallerin; 4. Countess Vandal; 5. Golden Dawn; 6. Crimson Glory.
